

## Patient Consultation Summary

Date: 2025-06-17

Patient Name: Ravi Sharma

Patient ID: P123456

Reported Symptoms: Low-grade fever, dry cough, chest discomfort while breathing, fatigue.

Duration of Symptoms: 2 weeks

Severity: Moderate (fever around 100F, cough worsens at night).

Medical History: COVID-19 (2021), mild asthma.

Current Medications: Paracetamol 500mg twice daily, cough syrup at night.

Additional Notes: Symptoms started mildly and worsened over time. No recent travel or contact with sick individuals.

Suggested Next Steps: Further investigation to determine the cause of symptoms (e.g., chest x-ray, blood tests). Consideration of alternative treatments if current medications are ineffective.

Location: Ahmedabad, Gujarat
